

Cube

Cuboid

Sphere

Pyramid

Cylinder

Cone

**Cuboid**

**Volume**

The amount of space inside the shape.

Volume of a cuboid = length × width × height

Volume =  $5 \times 3 \times 10 = 150$       **Volume =  $150 \text{ cm}^3$**

**Surface Area**

The total area of each of the faces.

Surface Area =  $2 \times (3 \times 5) + 2 \times (3 \times 10) + 2 \times (10 \times 5)$

Surface Area =  $2 \times 15 + 2 \times 30 + 2 \times 50$

Surface Area =  $30 + 60 + 100$

Surface Area = 190      **Surface Area =  $190 \text{ cm}^2$**

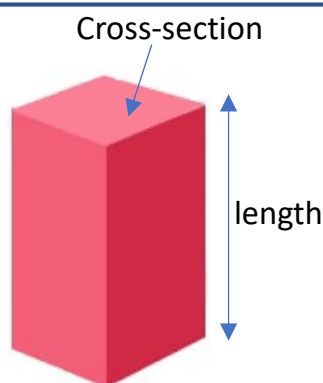

**Units**

Volume:  $\text{mm}^3, \text{cm}^3, \text{m}^3$

Surface Area:  $\text{mm}^2, \text{cm}^2, \text{m}^2$

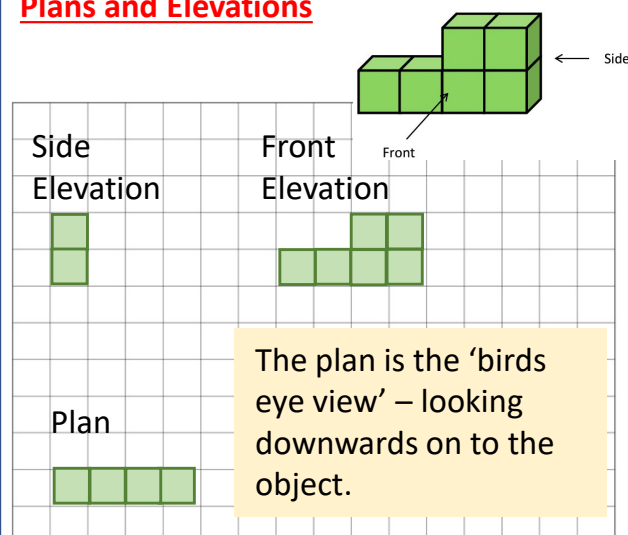

**Prisms**

These are all cuboid. They all have a cross section which is the same throughout the shape.

Volume of a Prism = Cross section × length

**Plans and Elevations**

The plan is the 'birds eye view' – looking downwards on to the object.
